

Minime Build Workflow

Single shared CI pipeline. Source: [.github/workflows/build.yml](#). Compilation runs in two GHCR container images built by [containers.yml](#) ([minime-musl](#) arm64, [minime-glibc](#) amd64).

Per-job detail (from build.yml)

Job	Lines	Runner	Container	Script	Inputs	Outputs
build-bootloader	17-57	ubuntu-latest	host docker	scripts/build-bootloader.sh	minime/uboot/{config,out,patches}/	artifact bootloader-out (cache bootloader-*)
build-ui (musl)	59-108	ubuntu-24.04-arm	minime-musl:latest	scripts/build-ui.sh minui allium musl	submodules minime/ui/{minui,allium}/	artifact ui-musl → minime/ui/out/ (cache ui-musl-*)
build-ui (glibc)	59-108	ubuntu-latest	host docker	scripts/build-ui.sh minui allium glibc	submodules minime/ui/{minui,allium}/	artifact ui-glibc → minime/ui/out/ (cache ui-glibc-*)
build-os	110-197	musl→arm, glibc→amd	minime-musl:latest or minime-glibc:latest	make components + image update ×2	bootloader-out, ui-{musl glibc}, minime/boards/	*.img.xz, *.tar.xz → testing release

Helper scripts & targets

Script / target	Role	Path
build-bootloader.sh	U-Boot + ATF for rk3326 / rk3566 / h700	scripts/build-bootloader.sh
build-ui.sh	MinUI (Make) or Allium (cargo), musl glibc	scripts/build-ui.sh
build.sh (per OS)	Alpine abuild / Buildroot make — kernel, rootfs, packages	minime/targets/alpine/scripts/build.sh minime/targets/buildroot/scripts/build.sh
genassets.sh	Stage FAT32 payload (UI tarball + roms) into image dir	minime/build/genassets.sh
mkimage.sh	Assemble raw SD image with genimage	minime/build/mkimage.sh
mkupdate.sh	Build OTA update tarball	minime/build/mkupdate.sh
Makefile (per OS)	Orchestrate components / image / update targets	minime/targets/alpine/Makefile minime/targets/buildroot/Makefile
common.mk	Shared image/update rules calling genassets/mkimage/mkupdate	minime/targets/common.mk

Cache keys (build.yml:34, 85, 150, 160) · Release: **gh release upload testing** minime/targets/<os>/out/<board>/*.img.xz, *.tar.xz gated by `github.ref == refs/heads/main`. Companion workflows: [containers.yml](#), [sync-kernel.yml](#), [update-submodules.yml](#).
